# **School Performance Rankings: 2023/2024 National Examinations Results.**

**Kigali, December 2024**

## FOREWORD

It is with great honor that I present this publication of school rankings based on the results of the 2023/2024 National Examinations. The primary goal of administering national examinations is to measure how learners completing an education cycle have achieved the expected learning outcomes and met the established benchmarks. This assessment serves as an essential tool to evaluate the effectiveness of our education system and ensure its alignment with national standards.

Publishing school rankings is a strategic move designed to promote transparency, accountability, and continuous improvement within the education sector. By providing a clear and comparative ranking of schools' performance, this publication serves multiple purposes. They act as a mirror reflecting the strengths in schools that performed well, while also highlighting those that require additional efforts to improve. At the same time, they promote healthy competitions and encourage all schools to pursue excellence.

Furthermore, these rankings provide valuable information to parents and guardians to make informed decisions about their children's education. They also provide policymakers and educators with important information to guide interventions and resources allocation, ultimately contributing to equity and quality in education.

As we celebrate the achievement of schools and learners who excelled, let us also renew our collective commitment to addressing the challenges faced by schools that did not meet expected performance levels.

I extend my gratitude to all those who contributed to the successful administration of the 2023/2024 National Examinations and the compilation of this publication.
